### Semi-automatic gas bollard

Semi-automatic bollard with internal spring and mechanism release system by key. Designet and built with the same styling as the automatic models so that they can be combined in the same installations. Available in two dimensions.

#### • Gas bollards

- Break-in resistance: **150 000 J**
- Rod steel, cathoporesis and coating; stainless steel (optional)
- Adhesive film-reflectORIZED band, customizable (optional)
- End stroke automatic locking system with assisted shaft rising
- Mechanism release system by standard triangular bit release key; also available in a security version with special bit (optional)
- Accessorisable with LED light cap
